#925 Clear Skylight Coating

Use For:

- Specially Formulated For Reconditioning Fiberglass Skylights
- Clear Sealer For Wood And Masonry

#925 Clear Skylight Coating, when applied properly, will give worn fiberglass skylights additional years of useful life. Clear Skylight Coating may also be used as a clear sealer on other surfaces such as wood and masonry. Not for use on acrylic skylights.

Directions For Use

Surface must be dry and free of dirt, dust, oil, grease, wax, rust, chalky or loose paint, mildew and any other surface contamination that may inhibit adhesion. Repair any splits or holes using proper sealing compound.

Using roller, brush or spray equipment, apply to the properly prepared surface at the rate of 1 to 1 1/2 gallons per 100 sq. ft. Severely weathered skylights may require one or more additional coats. Wait 30 minutes to 1 hour between coats. Rinse tools and equipment with water before using. Mix thoroughly before using. Do not dilute.

NOT RECOMMENDED FOR USE OVER ACRYLIC OR PLEXIGLAS SKYLIGHTS

READ AND FOLLOW DIRECTIONS CAREFULLY
Refer to latest SDS sheet for proper handling.
